graphien → describe

Description
of
People

How do we describe our population?

Based on
the size of
population

Based on
the pattern
Birth/Death/Migration

Based on
the
Structure
(M/F/ages)

Based on
Social Demograph.
(Social / Economic / Political)

But how do we measure it?

The Census

(The census Act, 1948)

by Registrar General (MHA)

First census was
conducted in 1951
(After Independence)

- It is used for planning
- Implementations of state policies

The Beginning

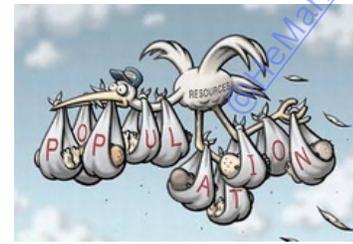

Malthusian theory of population

Thomas Robert Malthus

The theory of Population Growth.

"Human population tend to grow at a much faster rate than the rate at which the means of human subsistence grow"

Sol. Preventive checks
 Postponing marriage
 Sexual abstinence (Celibacy)

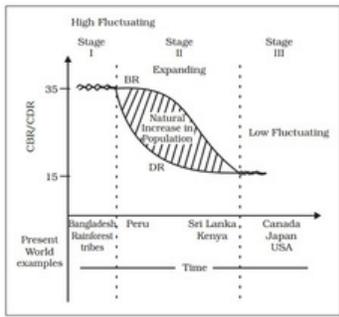

Humanity is condemned to live in poverty
 Positive check
 Famine
 Disease

Proved false

Why?? → European countries (19th century)

criticised by Liberal and Marxist scholars
 → unequal distribution.

Food production + standard of living with rapid growth of population.

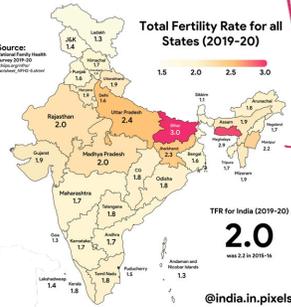

The Theory of Demographic Transition.

"It suggest that population growth is linked to overall level of economic development and every society follows a typical pattern of development related to population growth"

Stage I : under developed & technologically backwards.
 Stage II : Transitional stage
 ↓
 population explosion
 Stage III : Developed stage.

change in Indian Demography

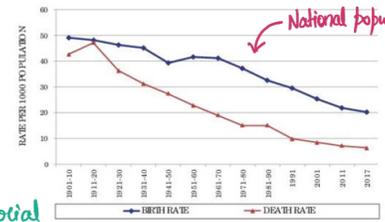

Year	Total Population (in millions)	Average Annual Growth Rate (%)	Decadal Growth Rate (%)
1901	238	-	-
1911	252	0.56	5.8
1921	251	-0.03	-0.3
1931	279	1.04	11.0
1941	319	1.33	14.2
1951	361	1.25	13.3
1961	439	1.96	21.6
1971	548	2.22	24.8
1981	683	2.20	24.7
1991	846	2.14	23.9
2001	1028	1.95	21.5
2011	1210	1.63	17.7

Before 1931 both DR & BR were high.
 Eg: Influenza Epidemic (Spanish Flu) → 125 lakh died (Visaria & Visaria 2003)

After 1931 → Transitional moment
 DR ↓ But BR ↑

It is a social phenomena slow change.
 → level of education and awareness
 Eg: Kerala TFR 1.8 Below replacement level
 Bihar TFR 3.0 Above replacement level.

CHART 1: BIRTH AND DEATH RATE IN INDIA 1901-2017

 Ministry of Health and Family Welfare, Government of India, Economic Survey 2018-19, Government of India.

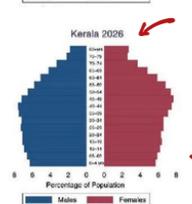

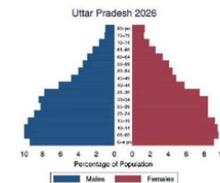

Population Growth

- ✓ Green Revolution 1960s
- ✓ Irrigation system
- ✓ NREGA
- ✓ communication

Year	0-14 Year	15-59 Year	60+ Years	Total
1961	41	53	6	100
1971	42	53	5	100
1981	40	54	6	100
1991	38	56	7	100
2001	34	59	7	100
2011	24	64	12	100
2026	14	69	17	100

Age Group: columns show percentage shares; rows may not add up to 100 because of rounding.
 Source: Based on data from the Technical Group on Population Projections 2006 and 2008 of the National Commission on Population, Government of India and 2008 of the National Commission on Population, Government of India. Website for 1961 Report: http://populationcommission.nic.in/factsheet.html

Year	Population (Millions)	Percentage of Total Population		
	Rural	Urban		
1901	213	26	89.2	10.8
1911	226	26	89.7	10.3
1921	223	28	88.8	11.2
1931	246	33	88.0	12.0
1941	275	44	86.1	13.9
1951	299	62	82.7	17.3
1961	360	79	82.0	18.0
1971	439	109	80.1	19.9
1981	524	159	76.7	23.3
1991	629	218	74.3	25.7
2001	743	286	72.2	27.8
2011	833	377	68.8	31.2

Sex Ratio → 940/1000

Pre-natal Diagnostic Techniques (Regulation and Prevention of Misuse) Act.

Literary Ratio → 74%

82% - 65%

Demographic dividend.

Consequences

Environmental Angle

Increasing population leads to increase in Demand

- Land to live
- Food to eat
- Resource to use

But resources are limited

result is Disasters

- Deforestation for land
- Degradation of Resources
- Reduction in Biodiversity

Eg: India has 18% of world's population and has only 2.4% of the world's land area.

Total forest cover in India = 24.62%.
Non-forest = 75.38%.

India has 18% of world's population and has only 4% of its water resources.

A study by Wynes and Nicholas (2017) 1 less child will lead to reduction in emission by 586 tonnes CO₂/year in developed country

Social Issues

India home to 4 major Biodiversity Hotspot.

- The Himalaya
- Indo-Burma Region
- The Western Ghats
- Sundaland.

1500+ - 70% Vege lost

A large No. of Indians face high to extreme water-stress NITI Aayog

"Atal Bhujal Yojna Paani Bachao, Paisa Kamao"
 ↓
 GW Management.

Overcrowding
↓
Destitution
↓
Crime
↓
Political Turmoil

Lack of Jobs. Eg: State of Employability Report.

Lack of Housing and School

Lack of Infrastructure

Eg: "Around 19 million household have a shortage of decent Housing in cities leading to a slum population of 65.5 Million living in 13.7 million slum households in million?"
- Ministry of Housing & Urban Affairs

Eg: Political turmoil in Afghanistan

Eg: Israel-palestine conflict over land.

Eg: Nazi Germany

Eg: Orangi Town (Karachi)

We saw environmental degradation where animals have less space to live. This gave rise to

Human-Animal Conflict

98 incidents due to tiger attacks since 2010
2,904 deaths due to elephant attacks since 2010

STEPS TAKEN TO MITIGATE CONFLICT
504km² of tiger reserves | 1,500km² of elephant reserves | 350km² of elephant reserves
3,500m² of electric fences | 250km² of boundary walls and clear of the forest
66 There are locations, where elephant proof fences, walls and solar powered fences could be possible - Expert report on human-wildlife conflict mitigation

Eg: Corona
Zika Virus
Ebola

Solution

Need to have a National policy to control the population in a Democratic way

Eg: National population policy 2000. objective is to bring TFR below replacement level and achieve a stable popⁿ by 2045.

Eg: Mission parivar Vikas implemented in thirteen states for substantially increasing access to contraceptives and family planning services.

Need to increase the marriage age so that fertility rate could come down.

Eg: Prohibition of child Marriage Act, 2006. The legal age of marriage in India is currently 18 years for women and 21 years for men.
* Bill 2021 → 21 for women

Government can use the modern communication to spread awareness.

Eg: Man Ki Boat.
Eg: Burundi's Agashi lead to reduce population rate 1.7 times.

Need to improve the Educational level of men and women so that they can take informed decision

Eg: Sarva Shiksha Abhiyan Right to Education Act, 2009
Beti Bachao Beti Padhao.

National Health Policy 2017 to address the unmet need for family planning.

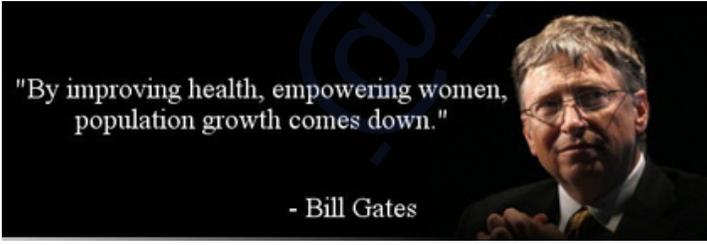

Family Planning logistics Management Information System (FP-LMIS) to ensure last-mile availability of family planning commodities.

Promote the use of Contraceptives and awareness.

Eg: TV advert. "Hum Do Hamare Do"

Antara programs Home delivery by ASHA worker

NFHS-5
↓
The use of Contra increased by 56.5%.

Women Empowerment the most appropriate measure.

Society level

Prerna strategy: JSK has launched this strategy for helping to push up the age of marriage of girls and delay in first child and spacing in 2nd child.

Santushi strategy: public-private partnership mode. Surgeons to conduct sterilization operation.
